

You can:

- **Serve Better Food**
- **Lower Operating Costs**
- **Use Less Floor Space**

Preliminary Appraisal Form

Toska Foodservice Systems, Inc. – provides the equipment and know-how to deliver cost effective meals to your population.

On Site Preparation – of food is preferred by most, but often too costly. The cost is high if the preparation and delivery systems are not carefully designed.

Kitchens Are Costly – the serving areas are costly too. The number of people cooking and serving only add to the cost of providing freshly prepared food.

We Know – that your needs are unique, and we also know that we have the technology and design methods needed to help you reduce your food delivery costs.

Toska Manufactures - Modular Kitchen and Serving Facility: a food preparation, serving, and payment system that delivers on site prepared food cost effectively. We are helping Businesses, Senior Care, Hospitals, Schools, and Government Agencies reduce food delivery costs.

We must examine the types and quantity of food required for you population in order to determine the cost effectiveness of the project. To determine the placement of equipment, we will need a floor plan of the existing (planned) food preparation serving areas.

To start the development of a budget for your project please answer the following questions and FAX this form back to us:

- Work week (*Mon-Fri*) _____
- Number of working days in a year _____
